Re: Requested Information

Dear Mr. Hedburg,

At DOGM's request, Grand Central Silver Mines, Inc. hereby submits the following information concerning the Mammoth Small Mine Permit ID # S/023/041 and the Eureka/Sunbeam/West Mammoth ID # E/023/033 Exploration Project Transfers:

1. Certified USDA aerial photograph of the Western portion of the Tintic Mining District dated August 6, 1998, with acetate reclamation disturbance overlay.
2. Two USGS 7 ½ minute series topographic maps for the "Tintic Junction Quadrangle, Utah," dated 1992, and the "Eureka Quadrangle Utah" map dated 1992.
3. Keystone Surveys patented claim property map dated March 6, 2000.

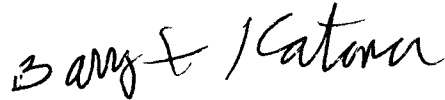

The reclamation disturbances identified in the foregoing enclosures are based on available information contained in the DOGM library, information contained in public Centurion Mines and Grand Central Silver Mines, Inc. documents, and information obtained during the field inspection of the subject mining properties with Jason Knowlton and DOGM representatives on April 6 and 7, 2000.

It should be noted that the Gold Chain (#14), Carisa Tunnel (#17), Boss Tweed (#18), Star Tunnel (#19), Columbus Tunnel (#24), some of the Mammoth mine openings and adits

(#10), and the Centennial Eureka openings and adits (#3) were not inspected by DOGM on April 6 and 7, 2000 due to time constraints. Because I have not been on these properties for over two years, the information provided relating to these properties may not be up to date.

Grand Central Silver Mines, Inc. remains dedicated to expediting the reclamation and mining permit transfer of the Mammoth Mine and exploration projects. If you have any questions, please do not hesitate to call me at (801) 598-8749.

Sincerely,

A handwritten signature in black ink that reads "Barry F. Katona". The signature is written in a cursive, flowing style.

Barry F. Katona  
Manager, Mining Subsidiary  
Grand Central Silver Mines, Inc.
